Professional Summary

Front-end web developer and military veteran specializing in responsive user interfaces. Experienced in building modular React architectures with Vite and crafting clean layouts with Tailwind CSS. Efficiently manages codebases using Git/GitHub workflows and automated CI/CD pipelines.

Technical Skills

Languages: JavaScript, HTML5, CSS3
Libraries & Frameworks: React, Tailwind CSS, Framer Motion
Developer Tools: Vite, Git, GitHub, VS Code
Core Practices: Continuous Integration & Deployment (CI/CD), Responsive Design

Web Development Projects

Coffee Bean Website

Front-End Developer | React, Vite, Tailwind CSS

- Engineered reusable React components utilizing state hooks and props to manage dynamic content rendering.
- Developed recursive layout components to efficiently map and render nested data layers.
- Styled the entire user interface using a utility-first approach with Tailwind CSS for seamless mobile responsiveness.
- Implemented strict version control and branch management natively through GitHub.

Professional Experience

Infantry Sergeant & Team Leader

U.S. Army | August 2021 – February 2026

- Led, trained, and managed tactical teams under high-pressure environments, ensuring operational readiness and strict asset accountability.
- Facilitated cross-functional communication and adjusted team workflows dynamically to meet strict organizational objectives.

Education & Certifications

- **JavaScript Professional Developer Certification** — Coalition of Information Technology Businesses (COITB)
- **Web Design Certificate (HTML5 & CSS3)** — Coalition of Information Technology Businesses (COITB)
- **Full-Stack Coding Boot Camp** — Ongoing Studies (React, SQL)
